SKILLS

Python	<div></div>
HTML + CSS	<div></div>
Django	<div></div>
JavaScript	<div></div>
Interpersonal and Communication	<div></div>
React	<div></div>

WORK EXPERIENCE

SOFTWARE ENGINEER (FREELANCER)
RICTS HOLDINGS | 2024 - 2025

DEC - JAN

I started and built a mobile carwash business where I worked 6 days a week. It was comprised of customers bringing in their cars, and also doing house-calls.

SOFTWARE ENGINEERING INTERN
PRINTCROWD | 2024

FEB - MAY

I worked and learnt systems design for backend and CMS navigation. It was all built on PHP which is a language I am unfamiliar with but the real value was in the corporate experience I gained whilst also juggling my final year of varsity.

WEB DEVELOPER (FREELANCER)
2022 - 2023

During this time I worked on many web projects for potential startups.

MY TECH STACK

PYTHON

Python was the very first programming language that I really took up and it very quickly became the language that I am the most well-versed in. Python allows for backend development, data analysis, and machine learning.

HTML + CSS

HTML and CSS were the first components of programming that I learnt in high school, and has always been the foundation of web development at it's core.

JAVASCRIPT

JavaScript has quite frankly changed the way that I see and work through web development, especially with JavaScript frameworks like ReactJS and NextJS.

REACT + NEXTJS

React and NextJS have completely redefined web development and high-complexity applications with Client and Server Rendering, as well as Advanced Routing and Nested Layouts.
